Patchcode sheets must be printed in their original size The scanner may not recognize them as patchcode sheets if they are enlarged or reduced.

Two types of camera-ready patch codes are provided: • 2 5-inch (62 5 mm) long patch codes which may be used when preprinting patch code labels or when printing patch codes directly on applica-tion documents.. Ready patch codes These copies adhere to the specifications provided and may be used by a printer when creating patch documents.. In Windows 8, the batch code sheets are saved to the applications table PATCH T (A4) and PATCH II (A4) sheets on A4-size paper, or PATCH T (LTR) and PATCH II (LTR) on LTR paper.
